Technical data overview

Technology	3D line scanning
Scan/frame rate	10,000 3D profiles/s
Grayscale measurements	✓
Scatter measurement	- / ✓ (depending on type)
Light source	Internal lighting Laser, Visible, Red, 660 nm, ± 15 nm
Factory calibrated	✓
Enclosure rating	IP65
Configuration software	Ranger Studio
Ethernet	✓, UDP/IP
Serial	✓, RS-422, Encoder

Product description

Ruler E is a perfect tool for in-line 3D-scanning applications. It is designed for the tough environments common to the timber and mining industries and will provide accurate 3D measurements at temperatures as low as -30 °C. Plus, the Gigabit Ethernet interface makes it suitable for remote operation over long cable distances. With its built-in light source and factory-calibrated 3D data, the camera instantly provides precise measured values to within a millimeter, making integration considerably easier. In addition to high-speed 3D measurements, the Ruler E camera also provides grayscale intensity and laser scatter measurements. These measurements reveal more about objects and, in turn, enable more precise and reliable decisions. With a choice of analysis tools, PC performance, and combining data from several Rulers, you can adapt the solution cost and performance to your specific requirements.

At a glance

- Factory-calibrated 3D measurements in millimeters at full production speed
- Highly accurate 3D measurements for widths from 100 mm up to 1.5 m
- Capture 3D, grayscale, and scatter simultaneously
- Easy to integrate without the need for external illumination
- Rugged housing for harsh environments and temperatures as low as -30 °C
- Remote operation over long cabling distances with Gigabit Ethernet

Your benefits

- High-speed measurement allows you to increase production throughput and still ensure product quality
- Accurate size and position measurement in 3D, regardless of an object's height or color, creating reliable solutions
- Simultaneously capturing 3D, scatter, and grayscale, allows for more reliable quality control and inspection
- Factory calibrated 3D with built-in lighting instantly provides results in millimeters, which makes integration easy
- Designed for tough industrial environments to ensure a long and problem-free life time

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
