

SaveAir Description

An independent diaphragm regulator that supplies a constant and exact outlet pressure regardless of input pressure fluctuations. Can be installed in any compressed air system

The SaveAir prevents *dynamic pressure waste* that arises when the pressure and flow (at the process point) are unnecessarily higher than those specified by the original manufacturer to achieve the desired function.

SaveAir Benefits

- Supplies compressed air systems with pre-set pressure. No gauge needed.
- Prevents compressed air waste (also known as dynamic pressure waste). Saves energy.
- Reliable, small and compact design that is easy to install and affordable to purchase.
- Locked to prevent pressure changes. Increases device service life. Tamper proof.
