

Mark 75 Series

CRN Registration Number Available

Wafer Style Control Valves

The Mark 75 wafer style control valve was developed by Jordan Valve as the next generation of control valves. Featuring all the benefits of the time-tested Sliding Gate design, in a lightweight, compact wafer-style body, the Mark 75 dramatically reduces the size and weight of conventional control valves.

The Mark 75 offers a variety of design features that help provide the superior performance customers expect from Jordan Valve.

PRICING ADVANTAGE

The Mark 75 offers an incredible pricing advantage in the market place due to its wafer style body. A 6" Mark 75 valve is only 2.23" (56,6 mm) face-to-face in comparison to a 6" Mark 707/711 that is 17.75" (451 mm) face-to-face.

What does this mean to you? You pay for less metal to make the valve. In the case above, 15.50" (394 mm) of metal! The actual material is only part of the savings. You pay less for machining time; even shipping costs are reduced due to the lighter weight.

WEIGHT ADVANTAGE

The weight advantage also allows you to spend less money and time on installation and support. With a 6" Mark 75 weighing less than 80 lbs (36,3 kgs), there is no need to rent a lift to put the valve in line as you would have with heavier alternative valves. Supporting the lighter weight Mark 75 is much simpler and less costly than a standard globe style valve.

With Jordan Valve's time-tested sliding gate seats at the heart of the Mark 75, the stroke remains much smaller than typical globe style valves. The shorter stroke means smaller actuators are needed to operate the valve, increasing the accuracy of the Mark 75 while reducing the overall weight and air consumption.

CAPACITY

The Mark 75 provides great capacity in a compact wafer style body. A 2" Mark 75 provides 72 Cv (62 Kv), a 6" Mark 75 provides 400 Cv (345 Kv) and an 8" Mark 75 provides 600 Cv (522 Kv) as the linear operating Cv. (Refer to Cv Capacity Charts for information concerning all line sizes).

EASE OF MAINTENANCE

The Mark 75 features a 'T' slot design connection to the disc. This connection allows for quick and easy reversing of functions. Instead of having to go into the actuator to change action, all that is needed in a Mark 75 is to turn the seats 180°. With this simple rotation, the valve can go from reverse acting to direct acting (or vice versa).

The stroke length of the Mark 75 is a slightly longer stroke than standard sliding gate valves. This longer stroke enables better turndown. Combined with the capacity of the Mark 75, the increased turndown makes for a great control valve.

SPECIFICATIONS

Sizes: 1" (DN25) through 8" (DN200)

1" (DN25) thru 6" (DN150) ANSI 150# / 300# (PN25/40) Class Wafer Style Valves (bolt-around); 8" (DN200) ANSI 150# (PN25) Class Wafer Style Valves (bolt-thru)

Body/Bonnet Connection

- 316 Stainless Steel (ASME SA-479)
- Carbon Steel (SA-105)

Trim Material

- 303 Stainless Steel (8" only)
- 316 Stainless Steel

Seats Materials

- Jorcote/316SS – standard
- Jorcote with 303SS - optional

Yoke Materials

- Ductile Iron (1" - 2")
- NAMUR Cast Iron

Actuator Case Material: Epoxy coated steel

Packing Material

- Spring loaded Teflon V-Ring to 500°F (260°C)
- Grafoil above 500°F (260°C)

Shutoff: ANSI Class IV tightness

Ranges: 3-15, 3-9*, 9-15*, 6-30 psi (0,2–1,0; 0,2–0,6; 0,6–1,0; 0,4–2,1 bar)

* positioner required

Action

- Direct (ATC)
- Reverse (ATO)

Body Rating (1" – 6")

- Stainless Steel 720 psi @ 100°F (49,6 bar @ 37,8°C); 480 psi @ 500°F with Teflon packing (33,1 bar @ 260°C); 445 psi @ 550°F with braided packing (30,7 bar @ 288°C)
- Carbon Steel 740 psi @ 100°F (51,0 bar at 38°C); 600 psi @ 500°F with Teflon packing (41,4 bar @ 260°C); 535 psi @ 550°F with braided packing (39,6 bar @ 343°C)

Body Rating (8")

- Stainless Steel 275 psi @ 100°F (19 bar @ 38,8°C) and 155 psi @ 550°F (10,7 bar @ 288°C)
- Carbon Steel 285 psi @ 100°F (19,7 bar @ 38,8°C) and 155 psi @ 550°F (10,7 bar @ 288°C)

Actuators

- 35M, 55M, 85M, 100M multi-spring actuator (depending on size/pressure drop)
- Direct mount pneumatic piston
- Electric motorized

Turndown Ratio Capability: Up to 100:1 (depending on application)

PRESSURE/TEMPERATURE CHART

SLIDING GATE FEATURES & BENEFITS

Jordan Valve's Sliding Gate Seats

Installed in the widest range of gas, chemical and steam applications the world over, our pressure regulators, temperature regulators and control valves have been providing the following benefits for over fifty years.

Shorter stroke length than globe or cage designs

- Provides faster response to input signal changes
- Significantly extends packing and diaphragm life
- Allows for more compact valve/actuator assembly

Straight-through flow

- Significantly reduces turbulence, thereby reducing noise and erosion
- Markedly increases rangeability associated with "flow to open" and "flow to close" designs
- Eliminate valve "chatter" commonly observed when valve is partially open

Ease of maintenance

- During seat/Cv change (seats are not screwed or pressed in body)
- Attributable to lightweight, compact design
- Fewer trim components

Features

- Easy installation between flanges with wafer body
- High flow rates
- Self cleaning, self lapping seats
- Reduced noise compared to conventional globe/cage valves
- More resistant to cavitation / flashing with straight through, wafer design

8" MARK 75 WITH 100M ACTUATOR & MK16IQ POSITIONER

- Trim: 316 SST
- Seat Materials: Jorcote with 316SS
 - no body gasket
- Actuator Case: 100M steel
- Packing Materials: spring loaded Teflon V-ring, grafoil above 500°F (260°C)
- Ratings:
 - Stainless Steel 275 psi @ 100°F (19 bar @ 38,8°C) and 155 psi @ 550°F (10,7 bar @ 288°C)
 - Carbon Steel 285 psi @ 100°F (19,7 bar @ 38,8°C) and 155 psi @ 550°F (10,7 bar @ 288°C)
- Flow Capacity: 600 Cv (522 Kv) Linear and Equal Percentage (determined by positioner)
- Maximum Pressure Drop: 250 psi (17,2 bar) with 100M actuator, 12-25 psi (0,83-1,7 bar) bench set with side mounted positioner
