

## FLOWSIC600 DRU

Ultrasonic gas flow meter for upstream applications

GAS FLOW METERS

**SICK**  
Sensor Intelligence.

### Technical data overview

<b>Measured values</b>	Volumetric flow a. c., volume a. c., gas velocity, sound velocity
<b>Measurement principle</b>	Ultrasonic transit time difference measurement
<b>Number of measuring paths</b>	2
<b>Hazardous area</b>	Class I Division 1 Class I Division 2
<b>Measuring ranges</b>	Measuring ranges depend on nominal pipe size
<b>Gas temperature</b>	-40 °C ... +85 °C
<b>Operating pressure</b>	0 bar (g) ... 102 bar (g) At 38 °C 0 bar (g) ... 95 bar (g) At 85 °C
<b>Nominal pipe size</b>	3" / 4" / 6" Schedule 80
<b>Enclosure rating</b>	IP66 / IP67
<b>Corrective functions</b>	Integrated device diagnostics and enhanced diagnostics via MEPAFLOW600 CBM software

### Product description

The innovative FLOWSIC600 DRU gas flow meter for upstream applications based on the FLOWSIC600. With a measuring range of up to 150:1<sup>1</sup>, the FLOWSIC600 DRU also covers flow ranges that previously required several orifice plates. Low manufacturing tolerances and wet-gas tolerant ultrasonic sensors ensure consistently low measurement uncertainty, even under challenging conditions. SICK therefore makes it possible to skip the otherwise common cost-intensive high-pressure flow calibration. The FLOWSIC600 DRU enables real-time diagnostics of devices and processes and is virtually maintenance-free - even with high liquid loads.

<sup>1</sup> Increasing measurement uncertainty at flow speeds of less than 0.9 m/s.

### At a glance

- Wide measuring range that covers the measuring ranges of several orifice plates
- Precision manufactured 10D inlet piping included
- Accuracy of  $\pm 1\%$  - no high pressure flow calibration required
- Capable of remote diagnostics
- Design for wet gas applications
- New diagnostic feature - wet gas detection
- Low maintenance

### Your benefits

- Low initial investment - precise measurement without an expensive high-pressure flow calibration
- Low subsequent investments - no costly measurement station upgrades or orifice plate changeovers thanks to the wide measuring range
- Lower operating costs - long maintenance-free operation, and servicing only when required as indicated by remote diagnostics
- High reliability thanks to real time monitoring of all device diagnostics data
- Extended process monitoring with unique wet gas detection feature
- Better measurement accuracy than orifice measurements under wet gas conditions
- Long service life thanks to the moisture- and contamination-resistant encapsulated ultrasonic sensors

### Fields of application

- Natural gas measurement in gas production
- Gas flow meter for well pads with multiple bores
- Allocation and verification measurements
- Measurement on VRUs
- Measurement on test and production separators
- Alternative to orifice plates

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
